Company Organizational Chart

Sales Department

Summary For The General Practice Of Production And Fabrication

A. Materials

All materials to be used must comply with the project's documents and specifications.

B. Measurements

Filled measurements should be taken by our site engineer and be given to our production manager for fabrication and production.

C. Fabrication

1. Shop Fabrication and Assembly

- Fabricate items in accordance with the project's documents and specifications and as indicated on the approved shop drawings.
- Properly mark and match-mark materials for field assembly and for identification as to structure and site for which is intended.
- Where is finishing is required, complete the assembly, including welding of units, before start of finishing operations. Provide finish surfaces of members exposed in the final structure free of markings, burns and other defects.

2. Bolted Connections

• Install threaded fasteners in accordance with the project's documents specifications.

3. Welded Connections

- specification requirements.

3. Holes for other work

final drawings.

D. Fabrication

Shop painting is required for miscellaneous metal works, except those member or portions of members to be embedded on concrete, surfaces to be field welded, and galvanized surfaces, unless otherwise indicated. Remove scale, rust and other deleterious materials before the shop coat of paint is applied. Apply one shop coat of metal primer paint to fabricated metal items. Apply two coats of paint to surfaces which are inaccessible after assembly or erection.

Change color of second coat to distinguish it for the first. Immediately after surface preparation, brush or spray on metal primer paint, applied in accordance with the manufacturer's instructions and a rate to provide a uniform dry film thickness of 1.5mm for each coat. U se painting methods which will result in full coverage of joints, corners, edges, and all exposed surfaces.

• Welded construction should comply with the project's documents and specifications for procedures, appearance and quality of welds and works.

• Assemble and weld built-up sections by methods which will produce true alignment of access without warp. Refer to the project's documents and

• Provide holes required for securing other work to structural steel framing, and for the passage of other work through steel framing members, as shown on the

Quality of Assurance

1. Products

Products includes all materials, components, units, accessories, fixtures etc. required for the execution of work and must be of the top quality of their kinds and never been used before. And must comply with the project's documents and specifications.

2. Delivery Of Products

Other than bulk materials which usually delivered in appropriate containers. All products must be delivered in suitable unopened containers, bags, bundles, packets or other standard packaging which are designed to protect the products from any damage from transporting the place of manufacture to the site. Deliveries shall be made to suite the approved construction time program, and any special handling or storage requirements shall be carried out in accordance with manufacturer's written conditions. Particular care shall be taken to ensure that no damage cased by climatic or atmospheric conditions during transportation.

All deliveries to the site must be identified with the material name, type quality and properly marked with the site location along with any other specified or requested classification.

3. Storage Of Products

Materials And goods shall be stored in an approved manner to avoid da tage and contact with contaminated substances or surfaces. Perishable materials in our pot be exposed to damaging elements. Storage places should be approved by the consultant engineer of incoming supplies and sampling for testing.

4. Inspetion Of Products

It shall be the consultants engineer's duty to inspect all the products before it is used in regards to its compliance with the projects documents and with the approved samples. Any products which are found to be unacceptable must be removed and replace at the contractor's expense.

5. Alternative Products

If the contractor's purposes to use the product which, while suitable for the intended use deviates in any way from the detailed requirements of the project documents, he must inform the consultant engineer in writing of the nature of such deviations at the time the product is submitted for approval and shall request a written approval. If substitute product is accepted, the contractor shall have the responsibility of coordination with all other work, to ensure capability and fit.

6. Source Quality Control

Notwithstanding the certificates required and submitted under another clause, the contractor should submit to the consultant engineer documentary proof that delivered material have originated from the agreed place of manufacture, and conform to the required standards and test referred to in the project documents.

7. Testing Agency

Any test may be required by the consultant engineer must be carried out by the approved laboratory.

Execution shall include all activities within the framework of the contract such as installation, erection, application and workmanship required to implement the works. The contractor should do anything necessary for the execution of the works either it was illustrated, describe or shown in the project documents. The contractor must also inform the consultant engineer in writing with all circumstances that might affect the correct execution of work or putting it in danger.

9. Workmanship

All workmanship must be to the satisfaction of the consultant engineer in the best and most modern methods and workmanlike manner, and any work deemed by the consultant engineer not to meet specified standards or in the project documents shall be removed by the contractor otherwise in the project.

10. Manufactured Products

All manufactured products shall be applied, installed, connected, erected, used, cleaned and conditioned in accordance with manufacturer's written instructions and directions if not mentioned otherwise in the project documents.

11. Tolerances

All products and works must comply with the allowable tolerance stated or service in this specification and the applicable project documents. Deviation stremenes tolerances are only permissible with written approval of the consultant signee

12. Protection Of Work

The contractor shall whenever necessary cover up and protects the works from weather and damage by his own or other workmen performing subsequent operations. He shall provide all necessary dust sheets, barriers, and guardrails and clear it away at completions.

The contractor must take all proper steps for protection of all places on or about the works which maybe dangerous to his workmen and other persons or to traffic. The contractor shall provide and maintain warning signs, warning lamps and barricades as necessary. The contractor shall, whenever practical, leave on fittings their protective tapes, coverings, wrappings and corner protectors and the like after they have been installed until all works in the region of the fittings has been completed.

Supply & Installation

The company specializes in the implementation of projects, villas, palaces and buildings that require the utmost attention to quality, service, minute details and technical requirements.

Restoration & Maintenance

Leaving the doors of houses without maintenance for long periods, as it poses a great danger to its users. Al-Sultan Company provides you with all the necessary maintenance work for all iron house doors within high quality and workmanship at the hands of specialized engineers and technicians with high experience in this field

Laser Cutting

Cutting using a laser technology for all sizes of iron and stainless steel up to 20 mm, for all works of decoration, cutting, etc.

Paints

provide painting services We using the best paint products such as Jotun, Sigma, Al Jazeera and Mass within a specialized team in the field of paint work.

Our Products

We have extensive experience and great capabilities to deal with large and small projects and provide the best specialized solutions to our clients. Among our main products are:-

Outdoor Gates

Handrails

E

Indoor Gates

Fiberglass

Client	: QIDDIYA INVESTMENT COMPANY
Contractor	BBIAGCJV
	ATKINS Comments
Submittal Reference	: QC02001-UN7-TEC-MAT-ARC-06-F00-00045
Material Submittal	: Material Submittal for (F2 & F4) - Area(3,4,8,9,10) Aluminium Doors; Windows and Frames; Glazed Aluminum Curtain Wall
Product	: Aluminium and Glazing with Accessories
Manufacturer/Supplier	: ALSULTAN
Date	: 23 October 2023

Architectural Comments:

- 1. The proposed manufacturer (ALSULTAN) is not included with specified Vendor's List- Contractor to submit pre-qualification of proposed manufacturer/supplier/sub-contractor subject to Engineer's review & approval.
- 2. This submittal with multiple items or scope as per specification shall <u>provide product/system information with corresponding</u> proper Compliance Statement for each specification with manufacturer's compliance or non-compliance narrative for each specification clauses.

A. Section 081116- Aluminum Doors & Frames

- Indicate which materials are intended for Aluminum Doors & Frames.
- Provide Product Data for all materials of Aluminum Doors & Frames assemblies in conjunction with Section 081116- Aluminum Doors & Frames, Part 1- General, Clause 1.03- Submittals, Sub Clause A.
- Aluminium Finishes: Contractor has to submit the aluminium coating technical data sheet to demonstrate compliance with Specification Cl. 2.05 items A-F (PVDF Coating). If the coating is other than the Specified, then Contractor to submit WCR.
- All required materials for the installation and fabrication of Aluminum Doors & Frames must be included in the submittal in relation with stipulated material requirements as per Section 081116- Aluminum Doors & Frames, Part 2- Products, Clause 2.01 Materials.
- Provide updated Product Certificates & System Performance Test Report from qualified 3rd Party Testing Laboratory in accordance with Section 081116- Aluminum Doors & Frames, Part 1- General, Clause 1.02- System Performance Requirements.
- <u>Refer to General Architectural Comments.</u>

B. Section 084213- Aluminum Framed Entrances

- Indicate all materials which are intended for Section 084213- Aluminum Framed Entrances.
- Provide Product Data for each type of product in conjunction with Section 084213- Aluminum Framed Entrances, Part 1-General, Clause 1.2- Action Submittals.
- Aluminium Finishes: Contractor still to submit the aluminium coating technical data sheet to demonstrate compliance with Specification Specification Clause. 2.8- Finishes, Sub Clause- A- Superior-Performance Organic Finish, (PVDF Coating). If the coating is other than the Specified, then Contractor to submit WCR.
- All required materials for the installation and fabrication of Aluminum Framed Entrances must be included in the submittal in relation with stipulated material requirements as per specification Clause 2.03 Aluminum Framed Entrance Door Systems, Sub Clause E- Materials.
- Provide all updated <u>Product Certificates & System Performance Test Report</u> from qualified 3rd Party Testing Laboratory in accordance with Specification Clause 2.02- System Performance Requirements.
- <u>Refer to General Architectural Comments.</u>

C. Section 084413- Glazed Aluminum Curtain Wall

- Indicate all materials which are intended for Section 084213- Glazed Aluminum Curtain Wall.
- Provide <u>Structural Calculation</u> for curtain wall system as per IFC Drawings.
- Provide <u>all</u> product information in conjunction but not limited with <u>Section 084413- Glazed Aluminum Curtain Wall, Part 1-</u> <u>General, Clause 1.7- Submittals, Sub Clause K- Material Submittals</u>
- Aluminium Finishes: Contractor has to fully comply with specification requirments for Interior & Exterior finishes. If the coating is other than the Specified, then Contractor to submit WCR.
- All required materials for the installation and fabrication of Glazed Aluminum Curtain Wall must be included in the submittal in full compliance with specification requirements.
- Provide all updated <u>Product Certificates & System Performance Test Report</u> from qualified 3rd Party Testing Laboratory in accordance with Specification Section 084413- Glazed Aluminum Curtain Wall requirements.
- <u>Refer to General Architectural Comments.</u>

3. General Architectural Comments: (to be addressed in compliance for each specification)

- A. Sustainability requirements- Provide Contractor's fully signed & sealed Sustainability Compliance Sheet for all materials that requires sustainability report as defined with respective specifications in conjunction with Spec. Section 018113 and Section 016000- Product Requirements respectively. (This has been raised so many times with the contractor)
 - Recycled contents of all aluminum products: Postconsumer recycled content plus one half of pre consumer recycled

ATKINS

Project Client Contractor

SIX FLAGS QIDDIYA

QIDDIYA INVESTMENT COMPANY

BBIAGCJV

ATKINS Comments

- content must not be less than 25 percent. Share the post and pre consumer recycled content details.
- ALUPCO therm 56W insulation material VOC test is missing

:

:

:

- ALUPCO therm 56D insulation material VOC test is missing
- EPD for Sunguard Glass is missing
- VOC test certificate of Silicone wacker sealant is missing
- JOTUN super durable VOC test report is missing
- EPD of the products
- VOC content and formaldehyde content of curtain wall is missing

B. Glazings:

- The proposed glazing manufacturer is included with approved Vendor's List.
- Provide Compliance Statement in relation with Specification Section 088000.
- Indicate/highlight the proposed specific type of glazing for each system in accordance with schedule & specification requirements.

C. Hardwares:

• Submit all required hardwares <u>marked for each system</u> in full compliance with respective specification requirements and hardware schedules.

D. Warranty Letter/s:

- The fully signed & sealed warranty by Contractor, Manufacturer/Supplier for each specification requirements must be submitted in accordance with Division 01 Section 016000- Product Requirements, Part 1- General, Clause 1.6- Warranties & Guarantees, Section 017700- Closeout Procedures, Part 2- Products, Clause 2.8- Warranties & Guarantees & Section 017820- Warranties.
- E. Provide submittal separation sheet for each systems.
- F. Provide IFC Drawings & Schedules for each system.

4. General Comments.

- A. Atkins confirms the review of this Material Submittal has been undertaken in accordance with the provisions stated in Division 01 Section 013300 Submittals Procedures, including but not limited to, Part 3 Execution Cl 3.2 The Engineers Review. The Consultant confirms the Contractor remains responsible for his obligations as stated within Cl 3.2 A Items 1 to 10, Cl B Items 1 to 4 and 3.2 C to L inclusive. Atkins advise the Product / Material must comply with the requirements of IFC Specification / Drawings. The Engineer / Consultant reserves the right to reject the quality of the equipment/materials, at any time during the Works, if that product / material is deemed inferior and or to be non-compliant with the IFC Specification, IFC Drawings and standards & requirements from Local Authority having jurisdiction.
- B. Contractor remains fully responsible to coordinate his works in accordance with the IFC Specification IFC Division 01 Section 013100 and 013300, (as applicable).

Â.	OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL				
	ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021		

1.1 INTRODUCTION TO THE HEALTH & SAFETY MANUAL

This manual explains the Occupational Health and Safety management system of **AL SULTAN CONSTRUCTION CO. (ASCC).** The requirements indicated in the Manual are aimed at achieving its commitments outlined in Occupational Health and Safety (OH&S) Policy and the OH&S Objectives by providing guidance to all company personnel and other interested parties. The **ASCC** recognizes that hazards and risks are always associated with its activities and operations thus; it has decided to implement an Occupational Health and Safety management system in accordance with OHSAS 18001:2007, together with Quality Management System (ISO 9001:2015).

The **ASCC** management commitments are expressed in its OH&S Policy. The succeeding sections describe the hazard and risk analysis methodology, interactions, sequence, and structure of organization, responsibilities, and authorities to implement the quality management system. Sections are organized as per the Index and provide overall guidance about the implementation of OH&S management system.

This manual also serves as a reference for customers, suppliers, auditors and any other interested party for the purpose of getting acquainted with the OH&S system followed by the **AL SULTAN CONSTRUCTION CO.**, **Riyadh**, **Kingdom of Saudi Arabia**.

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL				
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021		

1.2 HEALTH & SAFETY POLICY STATEMENT

It is the policy of AL SULTAN CONSTRUCTION CO. to promote good health, well-being, and occupational safety for its employees, other company employees including contractors and protect plant & equipment. ASCC is fully committed to;

- Provide safe and healthy conditions and reduce injuries and illnesses to the lowest possible level. No task is so important and no service is so urgent that it cannot be done safely.
- Comply with local and international regulations, including other regulations to which ASCC is subscribed, provided for Occupational health and occupational safety, related to its operational activities.
- Provide information and training to the employees including, where applicable, contractors and protect employees from any health and safety hazards and their Risk arising from operations and events at the work place.
- Install and maintain facilities and equipment in accordance with recognized and accepted standards essential to reduce or prevent exposure to hazards by workmen, plant & equipment.
- Provide appropriate personal protective equipment to all employees at the Company expense when engineering controls are not adequate to minimize exposure to OH&S Hazard and related Risks.
- Provide medical services as required by law and as may be dictated by existing circumstances or programs.
- Establish, implement and maintain measurable objectives and targets program to ensure continual improvement of H&S Management System.
- Review H&S Policy periodically to ensure its adequacy and suitability and communicate this policy to all employees and interested parties.
- Maintain the best possible Health & Safety performance, and in order to achieve this Standard, prevent occupational injuries, illnesses, pollution and seek continual improvement

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL				
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021		

2.0 SCOPE:

The Scope of implementation of OH&S Management System activities of AL SULTAN CONSTRUCTION CO. is;

"All kinds of metal Works, steel & stainless, railing, fence, stairs, canopy, grating, ladders, all kinds of aluminum works with glazing, structure, doors, windows, cladding, all kinds of doors & Gates, fiber, wood and metal Coating"

3.0 DEFINITIONS

- ASCC AL SULTAN CONSTRUCTION CO.
- H&S Health and Safety

Occupational (OH&S) Conditions & Factors that affect the well-being of employees, temporary workers, contractors, personnel, visitors & any other person in the work place.

- **Safety** Safety encompasses the Systems, Programs, Procedures, and practices required for the prevention of incidents.
- **Environment** Surroundings in which an organization operates, including air, water, land, natural resources, flora, fauna, humans and their interrelation.
- **System** A management tool for meeting an established objective made up of four steps i.e., Plan, implement, measure and adjust.

OH&SPart of an organization management system used to develop andManagementimplement its OH&S policy and manage its OH&S risksSystem

Risk Combination of likelihood of an occurrence of hazardous event or exposure(s) and the severity of injury or ill health that can be caused by the event or exposure(s)

Audit Systematic, independent and documented process of obtaining audit evidence and evaluating it objectively to determine the extent to which audit criteria are fulfilled.

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL				
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021		

- Incident Work related event(s) in which an injury or ill health (regardless of severity) or fatality occurred, or could have occurred.
- ill Health Identification, adverse physical or mental condition arising from and/or made worse by a work activity and/or world related situation
- **Interested party** Person or group, inside, or outside the workplace, concerned with or affected by the OH&S performance of an organization.
- **Hazard** An object, physical effect, or condition with potential to harm people, property, or the environment or affect on the company reputation.
- **Risk** The product of the chance that a specified undesired event will occur and the severity of the consequences of the event.
- **OH&S Audit** An independent, systematic and documented process of objectively obtaining and evaluating verifiable evidence to determine:
 - Whether the IMS and its results conform to the Q-HSE Audit Criteria.
 - Whether the system is implemented effectively.
 - Whether the system is suitable to achieve the Health, Safety, Environmental & Quality Policy and Objectives
- Non-Conformance A deviation from a requirement specified in the OH&S Management System, or an error, which could endanger the safety of the people, asset integrity, environment, the vessel or its cargo.
- **Risk Assessment** Process of evaluating the risks arising from a hazard(s), taking into account the adequacy of any existing controls, and deciding whether or not the risk(s) is acceptable.
- Acceptable Risk Risk that has been reduced to a level that can be tolerated by the organization having regard to its legal obligations and its own H&S Policy
- **OH&S Objectives** OH&S goal, in terms of OH&S performance that an organization set itself to achieve.
- **Workplace** Any physical location in which work related activities are performed under the control of the organization

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL				
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021		

4.0 OH&S MANAGEMENT SYSTEM

4.1 GENERAL REQUIREMENTS:

ASCC has established an occupational health and safety (OH&S) management system in line with OHSAS 18001:2007 standard as documented in this manual to identify and control the hazards and risks posed by its activities, operations and work environment to the health and safety of its employees, suppliers, guests and other interested parties. The **ASCC** shall implement, maintain and continually improve its OH&S management system.

The scope of the ASCC's OH&S management system is defined in clause 02 of this Manual.

4.2 OH&S POLICY:

The **ASCC** recognizes the fact that hazards and risks are always associated with its operations activities. The OH&S Policy, stated in clause 1.2, had been framed to suit the nature and scale of these risks. It also outlines ASCC's commitments to prevent injury and ill health to its employees and other persons having access to its premises, to comply with legal requirements applicable to its hazards, and to continually improve its OH&S management system and performance.

OH&S Objectives have been defined in (**Appendix-1**) to achieve the stated OH&S policy. These objectives, including the OH&S policy (clause 1.2) and Emergency Response Contacts (Appendix 04 of Procedure # ALS-HSP-004) are reviewed and revised, if necessary, during management review meetings in order to ensure continuing relevance and suitability to the ASCC.

This policy is internally communicated to ASCC personnel by displaying it in conspicuous locations inside the ASCC facility including Office locations, and also by including it in Induction training programs. This is done to make sure that all personnel are aware of their individual occupational health and safety obligations.

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL				
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021		

4.3 PLANNING:

4.3.1 Hazard and Risk Analysis

Hazards and risks associated with activities, operations and facilities are identified and assessed initially. Persons who are at risk are determined followed by an evaluation of the adequacy of existing risk control measures. Additional measures are instituted for risks which are evaluated as having inadequate controls. Records of hazard and risk analysis are documented in documentation structure level-3, Job Safety Analysis (ALS-HSF-001/1) form. Same process is applied prior to introducing changes in the ASCC OH&S management system, activities or operations that may impact the health and safety of employees, guests, suppliers or other people in the workplace. Hazard and risk assessments are carried before start of any activity or process and also reviewed periodically or as required upon approval of Top Management to ensure that all OH&S hazards and risks are identified and effectively managed and that risk controls are The Legal, OH&S and other requirements are also considered in adequate. determining appropriate risk controls. The appropriate H&S procedure for Hazard Identification, Risk Assessment and Risk Control Procedure (ALS-HSP-01), is established to ensure its effective conduct. HAZARD IDENTIFICATION & RISK ASSESSMENT REGISTER (ALS-HSF-001)

4.3.2 Legal and Other Requirements

Legal and other OH&S requirements applicable to ASCC are identified, accessed and updated periodically in Legal Requirements identification and Compliance Evaluation (ASCC-HSF-02) register. The applicable legal requirements and other requirements which the ASCC subscribes to have been taken into account while establishing, implementing and maintaining the OH&S management system. The OH&S Management Representative is responsible for ensuring the updating and communication of the legal requirements to the processes.

Relevant information on legal and other requirements to its employees is communicated during appointment of the employee and, if necessary, is updated

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL				
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021		

during meetings. Relevant legal and other OH&S information is communicated to customers and interested parties, upon request, through company profile, company manual, policy and meetings. Records of assessment and programs are also maintained, wherever applicable. The H&S Procedure Legal Requirements identification, Compliance and Evaluation Procedure (ALS-HSP-02) has been established for the purpose of identifying legal and other requirements applicable to the ASCC's OH&S hazards and evaluating compliance to such requirements on a periodic (yearly) basis.

4.3.3 Objectives and Safety Management Programs

Objectives and Program pertaining to Occupational Health and Safety (OH&S) have been defined in line with the documented OH&S policy, and are outlined in **Appendix 1 (Level-3)** of this manual. The OH&S objectives are identified based on the OH&S hazards and risks and the identified control measures. Factors such as technological options, financial, operational, business requirements, and viewpoints of interested parties are also considered when establishing the OH&S objectives. Objectives Programs is established and effectively maintained in order to demonstrate continual improvement of the system. The OH&S objectives & programs (Appendix-1) are reviewed by the ASCC Managers and OH&S MR during management review meetings and are revised accordingly.

4.4 IMPLEMENTATION AND OPERATION:

4.4.1 Resources, Responsibility and Accountability

Resources such as internal auditors, safety officers, communications, firefighting and first aid equipment, infrastructure, external trainings, response plans, specialized skills and financial resources are made available to effectively implement, maintain and continually improve the occupational health and safety management system.

The responsibilities and accountability of persons whose work presents an effect on

Rt .	OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL					
	ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021			

OH& S are defined through Organization Chart Appendix – D of Quality Manual (ALS-QSM-001) and their Job Descriptions, under QMS level-3 documents (ALS-FRM-601). The same is also communicated through regular safety meetings, tool box talks, notice boards, internal memos, and work instructions, wherever applicable, in order to facilitate awareness of individual responsibilities and adherence to the OH&S requirements. The trainings needs are identified, as required, to impart the job descriptions and responsibilities in each processes throughout the ASCC.

The OH&S Management Representative ensures that the OH&S management system is established, effectively implemented and continually improved. It is equally his responsibility to report to top management the performance of the OH&S management system. Responsibilities of Operations Manager and supervisors relating to OH&S are also defined in the relevant management system procedures.

4.4.2 Competence and Training

Suitable and competent personnel who are required to perform tasks that affect OH&S in the workplace are selected through a proper recruitment process. The Competence is based on skills, knowledge/education, aptitude, trainings and experience. These are made evident in the job descriptions. Competency of the personnel is being effectively controlled and maintained.

Department Head identified and evaluate the training requirements needed by their personnel or staff. Yearly training plan shall be maintained by responsible and training records shall be maintained as per the training conducted.

All new employees of ASCC are required to undergo Induction training program to familiarize their job requirements and the OH&S Management System. This program defined in such a way that new employee clearly understand the channels of internal

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL		
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021

communications.

Through immediate superior or department head, the ALS Management conducts performance evaluation to each employee as their basis for giving increment and regularization. The new employee will be evaluated on the basis of their performance by their immediate superior or the department head prior to the completion of their probationary period of 3 months or prior to their regularization.

Job Description of Staff	ALS-FRM-601
Induction Training for new Employee	ALS-FRM-602
Performance Evaluation	ALS-FRM-603
Training Schedule	ALS-FRM-604
Training Record	ALS-FRM-605
Competency Skill Matrix	ALS-FRM-606

4.4.3 Communication and Consultation

The Procedure for **Communication and Consultation (ALS-HSP-03)** is implemented to see to it that effective arrangements for communicating the ASCC's OH&S hazards and management system internally and externally are established. Employees are involved in hazard and risk analysis, incident investigation and are consulted on matters that may affect their health and safety in the workplace. Further reference can be made to various applicable procedures including **Incident Investigation (ALS-HSP-005)** and **Hazard Identification and Risk Assessment (ALS-HSP-001)**. The means of communication are via internal memos, posters, notice boards, letters, website, trainings and internet. Consultations with employees are done during safety meetings, tool box talks, interviews, discussions and investigation process. Contractors and suppliers who work for or on behalf of the ASCC are consulted on changes in the workplace or activities that could affect their OH&S.

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL		
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021

4.4.4 Documentation

The Occupational Health and Safety Management System documentation is essential part of ASCC which is defined in total 04 levels, includes as following:

- Level-1 \ Health & Safety Policy & Health & Safety Manual
- ✤ Level-2 \ Management System Procedures.
- Level-3 \ Process Flow-Charts and Work Instructions
- Level-4 \ Formats and Logs
 - The following is summary of content made available herein OH&S Manual.
- Occupational Health and Safety Policy (in Clause 1.2 of this manual) and OH&S objectives (Appendix 1 of this Manual) and Emergency Response Contact Details (Appendix 2 of this Manual);
- Scope of the OH&S management system (in clause 02 of this Manual);
- OH&S Manual, (ALS-HSM-001);
- Documented procedures and records (as referred in Document master list (ALS-FRM-002) and in Quality Records Log (ALS-FRM-001).

4.4.5 Control of Documents

A procedure for Documents and Data Control has been established and is currently implemented in whole ASCC Management System. This is outlined in procedure **Control of Documents & Records (ALS-QSP-001)** which demonstrates the method for:

- Controlling and the need for controlling;
- Establishing, preparation, review for adequacy, approval, re-approval and issue;
- Condition of changes;
- Controlling the changes;
- Identification of changes;
- Identification;
- Legibility;

OCCUPATIONAL HEALTH & SAFETY MANAGEMEN SYSTEM MANUAL		
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021

- Readability;
- Ensuring availability of latest version of applicable document at the point of use;
- Controlling documents of external origin determined by the ASCC to be necessary for the planning and operation of the OH&S management system;
- Controlling obsolete documents;
- Responsibilities and authorities involved.

4.4.6 Operational Control

The various Production Procedures (Level-02) and Work Instructions (Level-03) are established for Operational Control to ensure that ASCC operations and activities associated with identified hazards and risks are controlled and related responsibilities and accountability are determined and defined. Hazardous activities and operations are identified through a hazard and risk analysis, as per procedure, Hazard identification and Risk Assessment (ALS-HSP-01), where resultant risks are rated and adequacy of controls is determined. Controls include:

- Operational controls in the form of method statements, work instructions, safe systems of work and effective supervision;
- Controls related to purchased goods, equipment and services (i.e. obtaining approval for raw material & consumable material purchase, supplier evaluation, availability of product information, documents for preventive maintenance, etc.).
- Controls pertaining to supplier and other visitors to the workplace (i.e. safety induction, operating procedures, work supervision and monitoring).

4.4.7 Emergency Preparedness and Response

The procedure for **Emergency Response (ALS-HSP-04)** supported by Emergency Response Plans (ERPs) have been developed and relevant personnel have been identified in order to effectively communicate and take any necessary actions. The

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL		
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021

OH&S Management Representative (and SUB-MR) and safety personnel ensure that **Mock Drills (ALS-HSF-05)** report are conducted regularly and recorded, wherever applicable, in order to create awareness of the OH&S consequences, actual or potential, of their work activities and the benefits of improved personnel performance. Review of response plans is mandatory after the occurrence of any incident or emergency.

4.5 CHECKING

4.5.1 Performance Measurement and Monitoring

The established procedures and Work Instructions have been implemented to regularly monitor and measure the ASCC's OH&S performance and the key characteristics of its operations and activities. These applicable procedures as per organization requirements address operational needs for:

- Appropriate qualitative and quantitative measures;
- Monitoring of OH&S & Quality objectives;
- Monitoring of effectiveness of risk control measures;
- Proactive measures of performance to monitor compliance with safety management programs and operational criteria and applicable legal and other requirements;
- Reactive measures of performance to monitor incidents and other historical evidence of deficient OH&S performance;
- Recording of data and results (monitoring and measurement) sufficient to facilitate analysis of corrective and preventive actions;
- Calibration and maintenance of monitoring equipment, wherever applicable, for any performance measurement and monitoring, if required.

4.5.2 Compliance Evaluation

Compliance with legal (statutory and regulatory) and other requirements applicable to the ASCC's operations and activities is evaluated periodically for conformance to established QMS and OH&S management system. The Reference can be made to documented Procedure for Legal Requirements identification and Compliance

OCCUPATION	Fety Management Ual	
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021

Evaluation Procedure (ALS-HSP-02) where the results of periodic evaluation are recorded in Legal Requirements identification and Compliance Evaluation (ALS-HSF-02) register.

4.5.3 Incident Investigation, Nonconformity, Corrective and Preventive Action4.5.3.1 Incident Investigation

The procedure established for Incident Investigation (ALS-HSP-05) demonstrates the method of how the ASCC carries out an incident investigation (accident, near miss or emergency) as well as the specific responsibilities and authorities of ASCC personnel. Incident investigation log (ALS-HSF-07) forms part of reactive measures of OH&S performance as stated in Section 4.5.1 Performance Measurement and Monitoring of this Manual. Incident facts are entered initially either in form Incident /Accident Report (ALS-HSF-06) or in form NCR / CPA Report (ALS-FRM-008) after which a full investigation report is finalized and submitted to the ASCC Executive Manager. The procedure for Incident Investigation (ALS-HSP-05) delineates how the following processes are carried out and by whom:

- Incident scene preservation;
- Incident investigation documentation;
- Investigation process.

4.5.3.2 Nonconformity, Corrective and Preventive Action

The need for corrective and preventive action is determined on the basis of identified actual and potential OH&S nonconformities. Corrective Action Requests are normally generated by nonconformities such as a deviation in Quality planning, safe working systems, procedures or work instructions, unsafe acts and conditions as a result of inspections and surveys, deviation in emergency response, or an OH&S system audit finding while preventive actions

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL		
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021

result from identification of any problems requiring preventive action or the use of appropriate sources of information such as trend analyses of incidents, OH&S audit reports, records, risk analyses updates, new information on hazardous materials, safety inspections, and consultation and advice from employees. Reference can be made to established procedure **Control of Nonconformities**, **Corrective Preventive Action (ALS-QSP-002)** on how nonconformities are handled.

Requirement for corrective or preventive actions are documented in an OH&S **Nonconformity Report (ALS-FRM-008)** where the nature of the nonconformity is recorded. The process owner identifies the proposed corrective action and sets reasonable time frames for implementation. After the due date, the OH&S SUB-Management Representative reviews the action taken and evaluates the effectiveness of the corrective action. Requirements are defined to:

- Identify a nonconformity, correct it and take action to mitigate its OH&S consequences;
- Investigate a nonconformity, determine its root cause and take action to prevent its recurrence;
- Evaluate the need for preventive actions and implement the appropriate actions;
- Record and communicate the results of corrective and preventive actions taken;
- Review the effectiveness of corrective and preventive actions taken.

The Management Representative maintains records of all the corrective actions initiated analyses and reports trends periodically and during management review meetings. A procedure for **Control of Nonconformities**, **Corrective Preventive Action (ALS-QSP-002)**, is established to describe the method for taking corrective and preventive actions in order to avoid recurrence and

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL		
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021

prevent occurrence of nonconformities.

A risk assessment is carried out prior to implementation of corrective and preventive actions that identify new or changed hazards or necessitate new or changed controls. Risk assessment is conducted according to the provisions of **Hazard Identification and Risk Assessment (ALS-HSP-01).** Changes arising from corrective and preventive actions are then incorporated to the OH&S management system documentation.

4.5.4 Control of Records

An Integrated Management System procedure for controlling records had been established and is currently implemented in all activities of AFIC, which will also be referred to in controlling OH&S records. This is outlined in the procedure **Control of Documents and Records (ALS-QSP-001)** which demonstrates the method for:

- Evidence of conformity to requirement;
- Effective operation of OH&S and QMS management systems;
- Legibility;
- Identification and traceability;
- Retrieve;
- Storage;
- Protection;
- Retention period;
- Disposition.

4.5.5 Internal Audit

A system of planned and documented OH&S audits (ALS-QSP-002) is used to monitor the effective and efficient operation of the OH&S System as per documented procedure Internal Audit / Control of Non Conformity & Corrective and Preventive Action (ALS-QSP-002).

Qualified personnel not having direct responsibility in the areas being audited perform audits. The Management Representative is responsible for the planning and frequency

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM MANUAL		
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021

of auditing of various sectors. This plan is based upon the results from the previous audit and general performance of the system. These results are recorded as per the procedure for the Internal Audit process.

It is the duty of the auditor to discuss the results of the audit with the auditee. In addition the auditor must document the results along with a completion date of any Correction / Corrective / Preventive action on the non-conformity report.

Follow-up will verify and record implementation and effectiveness of corrective action.

The Management Representative retains all reports. The results and effectiveness of any corrective action taken are discussed at the management review meetings. Records are kept as described in procedure for **Control of Documents and Records** (ALS-QSP-001).

4.6 MANAGEMENT REVIEW

The Operation Manager in coordination with Quality Management Representative shall review and evaluate the ASCC OH&S system for suitability and effectiveness in Management Review Meeting. **Management Review Meeting shall be conducted twice in a year every six month together with Quality System Management Review and upon the completion of each cycle of Internal Quality Audit**.

Management Review Meeting Notification shall be issued to the participants of the management review meeting by the Management Representative, one week prior to the Management Review Meeting. Records / Minutes of Management Review Meeting shall be prepared by the management representative at the end of each management review.

Input to management reviews shall include:

(a) Results of internal audits and evaluations of compliance with applicable legal requirements and with other requirements to which the organization subscribes;

- (b) Results of participation and consultation;
- (c) Relevant communication(s) from external interested parties, including complaints;
- (d) The OH&S performance of the organization;
- (e) The extent to which objectives have been met;
- (f) Status of incident investigations, corrective actions and preventive actions;
- (g) Follow-up actions from previous management reviews;

(h) Changing circumstances, including developments in legal and other requirements related to OH&S; and

(i) Recommendations for improvement.

The outputs from management reviews shall be consistent with the organization's commitment to continual improvement and shall include any decisions and actions

OCCUPATIONAL HEALTH & SAFETY MANAGEMEN SYSTEM MANUAL		
ALS-HSM-001	Revision: 00	Issue Date: 03-OCT-2021

related to possible changes to:

- (a) OH&S performance;
- (b) OH&S policy and objectives;
- (c) Resources; and
- (d) Other elements of the OH&S management system.

The output of the all the review input points shall be recorded in **Report / Minutes of Management Review (ALS-FRM-013).** Meeting Records shall be maintained for evidence or reference purpose.

Relevant outputs from management review shall be made available for communication and consultation.

QC PROCESS FLOW			
RE	ALS-QPF-701	Revision 00	Issue Date: 01-JULY-2021
	Prepared By: QMR		Approved By: MANAGER

1. Purpose

1-1 This procedure aims at describing the quality control operations used to verify product requirements have been met.

2. Scope

2-1 This procedure applies to all production and product / material delivery and release stages that need to be monitored and measured to ensure conformance with product requirements.

3. Definitions

- 3-1 **<u>Product requirements</u>**: All needs or expectations are generally implied or obligatory by the customer, national standards or relative to product characteristics.
- 3-2 **<u>Quality Control</u>**: Part of quality management focused on fulfilling quality requirements.

4. Responsibilities

- 4-1 The QC Engineer is responsible for ensuring the effective implementation of this procedure, and that all related responsibilities are communicated and understood.
- 4-2 The QC Engineer is responsible for ensuring that conformance to product requirements is maintained, including conformance to customer requirements for customer property incorporated within the finished products.
- 4-3 The QC Engineer is responsible for the selection of all needed measuring and monitoring devices needed to ensure product conformity and the co ordination between all departments as to the requisition of those devices.
- 4-4 QC Engineer is responsible for implementing this procedure using all suitable devices.
- 4-5 QC Engineer is responsible for ensuring the unit is producing required results relative to product requirements and specifications.
- 4-6 The Quality supervisor is responsible for reporting to the QC Engineer on all discovered problems and is authorized to stop production operations, incase of nonconformities or problems that may have a serious impact on the product quality.

		QC PROCESS FLOW	
RE	ALS-QPF-701	Revision 00	Issue Date: 01-JULY-2021
	Prepared By: QMR		Approved By: MANAGER

5. Operation

5-1 <u>Customer Specification</u>

- 5-1-1 All product shall be inspected as per the customer's standards, or Al Sultan specification and other standards required by the customer.
- 5-1-2 If the customer does not specify any requirements, the QC Engineer shall use the Al Sultan Co. specifications.
- 5-1-3 The QC Engineer shall communicate all quality related customer requirements to all concerned departments in co ordination with the Technical consultant as and when necessary.
- 5-1-4 The QC Engineer shall ensure that all customer requirements are understood by all quality supervisors and shall ensure its effective implementation as per the customer's documented requirements, procedures and forms.
- 5-1-5 If any deviation found by the QC Engineer, or quality supervisor he shall issue a corrective action request and forward it to the Technical consultant, and shall follow-up with the Technical consultant until the problem is resolved.

5-2 Incoming material inspection:

<u>NOTE</u> :

- In case of Raw Material : Quality Control Engineer is the person responsible to act Upon
 In case of Spare Parts : Maintenance Engineer is the person responsible
- 5-2-1 Upon received of material to the stores, the storekeeper shall inform the relevant department's supervisor for further internal testing to confirm the specification.

to act upon

- 5-2-2 The concerned supervisor shall inspect the incoming material and sign on the receiving voucher Goods Receipt Note if confirm our specification.
- 5-2-3 For every delivery, the quality supervisors shall perform a partial/full analysis of raw material using the **Inspection/Test report.**
- 5-2-4 If the received material doesn't conform to AI Sultan's purchase order, requirements and specifications, the QC Engineer shall issue a Nonconforming products / Material report (ALS-FRM-008) as per the control over nonconforming products procedure (ALS-QSP-002).

	QC PROCESS FLOW		
Rt	ALS-QPF-701	Revision 00	Issue Date: 01-JULY-2021
	Prepared By: QMR	Reviewed & A GENERAL	Approved By: MANAGER

5-3 In-Process inspection:

- 5-3-1 Inspection through all Operational phases is monitored and recorded by QC Engineer/QC Supervisor.
- 5-3-2 If the raw material test result doesn't conform with Al Sultan specifications, or standards, the QC Engineer / QC Supervisor is authorized to stop the material for using production and informs the Technical consultant through an internal memo of the description of the nonconformance, for his suggest and corrective action.
- 5-3-3 Inspection for semi-finished product shall be conducted by the quality control supervisor using the Inspection / Test report by obtaining samples at different times in every shift, and testing them as per ALSULTAN requirements or Customer requirements as applicable.

5-4 Finished products inspection:

- 5-4-1 The QC Engineer/QC Supervisor shall collect finished product samples for testing and inspection.
- 5-4-2 The QC Engineer/QC Supervisor shall use the **Inspection/test Report** to inspect the finished products. If the material is not confirmed with the specification then QC Engineer/QC Supervisor will issue a **Nonconforming products / Material report (ALS-FRM-008)** as per the **control over nonconforming products procedure (ALS-QSP-002)**.

5.4-4 QC Engineer/QC Supervisor shall issue Test and Guarantee Certificate (TC&GC) for the guarantee of our product properties as per customer's P.O.

5-4-3 All used forms shall be forwarded to Technical Consultant for his review and opinion.

1. OBJECTIVES:

The objective of this procedure is to ensure effective control of the Quality Management System Documents and Records.

2. SCOPE:

This procedure covers the general correspondence of the company and its application to all required documents and Records to comply with the requirements of the Quality Management System.

3. RESPONSIBILITIES:

GENERAL MANAGER / Management Representative / Respective Department Heads

4. PROCEDURE :

4.1 Controlled Document

A Controlled Document is defined as a document, which is part of Quality Management System that is currently used as a reference in an organization to comply in the documentation requirements of the Quality Management System and has been prepared and signed by Management Representative, reviewed and approved by General Manager.

- All such documents are reviewed and Approved by General Manager prior to issuance.
- All Controlled Documents are marked by "**CONTROLLED COPY**" stamped. Unauthorized reproduction is prohibited unless with permission to the General Manager.
- A **Document Master List (ALS-FRM-002)** of controlled documents is maintained in order to monitor the currently issued documents and the obsolete documents.
- All Controlled Documents are updated when there are changes or modifications.

4.2 Uncontrolled Documents

An Uncontrolled Document is defined as a document that can be reproduced and post if requested or required by the third party (i.e. auditors, customer, suppliers, etc.)

• All uncontrolled copy is stamped / marked as "UNCONTROLLED COPY", which do not come under the scope of Document Control Procedure.

	QUALITY MANAGEMENT SYSTEM PROCEDURE CONTROL OF DOCUMENTS & RECORDS		
	ALS-QSP-001	Revision 00	Issue Date: 01-JULY-2021
	PREPARED BY: QMR	REVIEWED & APPROVED BY: GENERAL MANAGER	

• The documents that are defined uncontrolled but are issued/post by Quality Management System on understanding are not maintained by any of the copy holders.

RE		MANAGEMENT SYSTEM PROCEDURE ROL OF DOCUMENTS & RECORDS		
	ALS-QSP-001	Revision 00	Issue Date: 01-JULY-2021	
	PREPARED BY: QMR	REVIEWED & APPROVED BY: GENERAL MANAGER		

4.3 Obsolete Documents

Obsolete Documents are documents that were produced and implemented during the establishment of the Quality Management System, it is a previous document that has been revised / updated due to some change(s) and cannot be used as a reference.

- All Obsolete Controlled copies are marked as "**OBSOLALSE COPY**" and removed from the location and disposed or destroy properly to ensure that the only updated copies are used.
- Obsolete copies are retained for reference purposes only and are filed appropriately by Management Representative and / or the respective department responsible.

5. DOCUMENT CODING / IDENTIFICATION:

5.2 Quality Management System Documents – (Internal)

6. DOCUMENT ISSUE AND UPDATE:

The Management Representative and / or the Respective Department heads study and may identify the need to create a relevant documents (Procedure/Form).

- Draft a relevant document for interfacing with the other concerned / affected department. If unacceptable, the Management Representative and concerned Departments resolves any differences.
- The resolved documents are finalized by Management Representative / reviewed and approved by GENERAL MANAGER and forwarded to the concern department. The Management
- Representative prepares the **Document Create / Change Form (ALS-FRM-004)** attached with the finalized document.
- The finalized documents are reproduced and marked or stamped with "CONTROLLED COPY" by the Management Representative.

ULLUI ALSULTAN	-	MANAGEMENT SYSTEM PROCEDURE ROL OF DOCUMENTS & RECORDS	
	ALS-QSP-001	Revision 00	Issue Date: 01-JULY-2021
	PREPARED BY: QMR	REVIEWED & APPROVED BY: GENERAL MANAGER	

 The Controlled Documents are incorporate to the Document Master List (ALSULTAN-FRM-002). The Originally signed Controlled Documents is filed in Master File and the reproduced controlled copy is distributed to the concern departments.

7. DOCUMENT AND FORM APPROVAL AUTHORITY:

All Controlled Documents must be prepared, reviewed and approved by competent authority as defined below:

Document Type	Prepared by	Reviewed & Approved By
Quality Policy		
Quality Objectives		
Quality Manual	Management Representative	General Manager
Procedures / Process Map / Forms/Flowchart		

8. DOCUMENT IDENTIFICATION / DISTRIBUTION CONTROL:

Management Representative is responsible for identifying the Quality Management System Documents. All the QMS Documents are identified by the document reference number and the Current Revision number for to identify the Current revision status.

- A **Document Master List (ALSULTAN-FRM-002)** is maintained / controlled by General Manager in order to monitor all the documents required in the Quality Management System.
- Distribution of all the Quality Management System Documents is controlled through Document Distribution List (ALSULTAN-FRM-005) and Document Master List (ALSULTAN-FRM-002).

9. DOCUMENT AMENDMENTS / REVISION CONTROL:

- All types of amendments / revision in documents / forms are controlled. Document Create / Change Form (ALSULTAN-FRM-004) is needed for every changes / revision made in the Documents.
- The revised documents / forms are distributed by Management Representative to the concern department and retrieve the previous obsolete documents from the point of use.
- Management Representative shall mark / stamp the obsolete documents with "OBSOLALSULTANE COPY" and kept in Obsolete Document File for reference and disposed others.
- For any changes in any portion of documents, the whole documents will be re-issued and the Revision number and Issue date will also be change.

	ALS-QSP-001	Revision 00	Issue Date: 01-JULY-2021	
	PREPARED BY: QMR	REVIEWED & APPROVED BY: GENERAL MANAGER		

• The Management Representative will update the **Document Master List** (ALSULTAN-FRM-002).

10. CONTROL OF EXTERNAL ORIGIN DOCUMENT:

External documents including documents provided by the customer / documents or documents provided by third parties.

- All external generated documents are identified and marked / stamped with "EXTERNAL DOCUMENT" and are properly recorded by respective department as defined in the **External Documents Master List (ALSULTAN-FRM-003).**
- External Origin Documents is distributed but is limited to the concern department only, the Management Representative and the Department Heads will maintain the records of distribution on **External Documents Master List (ALSULTAN-FRM-003)**.

11. CONTROL OF RECORDS:

The Management Representative maintain and monitor the **Quality Record Log** (ALSULTAN-FRM-001) of all Departments which indicates the Record Name / Description of Quality Record, Record No., Filing Location, Responsibilities, Disposition and Retention Period.

- The Department Heads are responsible in safekeeping of the records under their responsibility.
- All Quality Records are maintained through labeled, indexed and Filed in a manner that will ensure easily retrievable.
- All Quality Records are kept / stored in suitable area that will prevent them from damage / deterioration.
- A retention period is established for each Quality Record and specified in a Quality Record Log.
- Records which are required to be disposed shall be destroyed through shredder.
